

PRO PLUG[®] SYSTEM

Fascia / Wood / Deck / Trim

Limited Warranty Statement

There are no warranties (including any of merchantability) that extend beyond the following. Starborn warrants its fasteners to be free from defects in material and manufacturing. Starborn's liability is limited to the purchase price of this product.

All metal fasteners have the potential to corrode. Fasteners used in corrosive environments and materials require higher levels of corrosion resistance. Starborn offers four types of exterior fasteners (listed in order of increasing corrosion resistance): epoxy coated steel, epoxy coated grade 410 stainless steel, grade 305 stainless steel, grade 316 stainless steel. For applications exposed to salt air, near large bodies of water, swimming pools or other areas where corrosion is more likely to occur, always use grade 316 stainless.

For more detailed information about corrosion, see the corrosion information page. This warranty is subject to revision without notice. Starborn Industries, Edison, NJ 08837 USA

PRO PLUG[®] System:

Starborn guarantees the performance of the Pro Plug[®] System for PVC Decking and Trim for the lifetime of the project, when installed according to the latest installation instructions as well as the instructions provided by the decking or trim manufacturer.

- Pro Plug for PVC plugs will remain flush with the deck or trim board surface.
- Pro Plug for PVC plugs will weather to the same degree as the deck or trim board.
- Pro Plug System for PVC fasteners will not corrode in pressure treated lumber (see instructions to determine which Pro Plug System for PVC fastener to use for specific locations or applications: epoxy coated carbon steel, grade 305 or grade 316 stainless steel).

This warranty is subject to revision without notice. Starborn's liability is limited to the purchase price of this product. Starborn Industries, Edison, NJ 08837 USA
